BLOOD SUGAR FASTING : 210 mg/dl, BLOOD SUGAR pp (2 HRS) : 383 mg/dl, GLYCOSYLATED HB (HB A1C) : 11.10 %

9:30 PM

The user's blood sugar levels are elevated, with a fasting blood sugar of 210 mg/dl and a 2-hour postprandial (after meals) reading of 383 mg/dl. This indicates that the user may have diabetes or prediabetes. Recommendations: * Monitor blood sugar levels regularly to understand patterns and make necessary changes to food intake and exercise routine. * Consider consulting a healthcare professional for proper diagnosis and treatment of diabetes or prediabetes.
